Note: please be careful when translating more intricate official / legal / regulation topics, it is **very difficult** to maintain accurate English translations while staying true to intricacies of the Austrian legal framework. More often than not, a simple 1:1 translation of terms and usage of these terms in English does not work well and will lead to confusion. For these reasons, BiPol decided against maintaining a blanket translation of most of our work and instead only translate when needed to avoid these issues (we discussed this topic multiple times throughout the past years). When in doubt, feel free to check back with us to avoid translation losses.
